

Specific Instruction for Seasonal Garden Bed Rest

1. Remove all plant material.

2. Turn off your water supply and remove the battery.

We are all responsible for water conservation in the garden.

3. Cover the entire surface of the bed with a black heavy tarp.

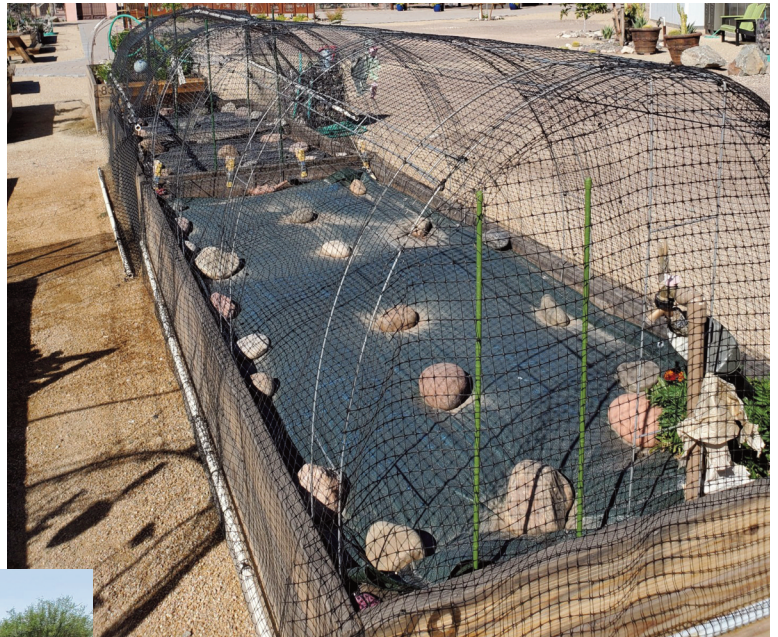

If needed, double the tarp.

4. Secure the tarp with many rocks.

This will alleviate unwanted weeds and pests.

5. Meet with a garden manager, so that your bed is checked and signed off.

Proper Garden at Rest
